SUMMARY

Backend-focused **MERN Developer (Fresher, 2025)** with hands-on experience building scalable web applications using **Node.js, Express.js, MongoDB, and React.js**. Strong foundation in **REST APIs, authentication (JWT, Google OAuth), database schema design, and secure backend workflows**. Comfortable with **Git-based development, debugging, API testing (Postman), and writing clean, well-documented code**. Eager to contribute to production-grade systems and grow under mentorship in a collaborative engineering environment.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3

Frontend: React.js, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB

Tools: Git, GitHub, Postman

Core Concepts: REST APIs, Authentication & Authorization (JWT, RBAC), Google OAuth 2.0, SDLC Basics, Debugging & Testing, Secure Coding Practices, Cloudinary Integration, Email Workflows

PROJECTS

NEXORA – Deal Sharing Web Application (MERN)

Final Year Project | 2025

- Built a **role-based MERN platform** (User / Business / Admin) for deal discovery, publishing, and management.
- Designed and developed **scalable REST APIs** using **Node.js + Express.js**, following **monolithic** architecture for maintainability and scalability.
- Implemented **secure authentication and authorization** using **JWT** and **Role-Based Access Control (RBAC)** for protected routes and dashboards.
- Integrated **Google OAuth 2.0** to enable secure and seamless user login and onboarding.
- Developed features such as **business registration & approval flow, search and filtering, and admin analytics dashboard**.
- Added **Cloudinary-based image uploads** and automated **email workflows** (password reset + notifications).
- Performed API testing, debugging, and validation using **Postman** to ensure stability and correctness.

Tech Stack: React.js, Bootstrap, Node.js, Express.js, MongoDB, JWT, Google OAuth, Cloudinary, Postman

TRAINING / EXPERIENCE

MERN Stack Training (Project-Based)

Royal Technosoft | Jan 2025 – Apr 2025

- Completed structured MERN stack training with strong focus on **real-world backend development**.
 - Practiced end-to-end project lifecycle: **requirement discussion → documentation → schema planning → implementation → testing**.
 - Strengthened skills in **REST API development**, authentication flows, and scalable MongoDB schema design.
 - Improved debugging and API validation practices through hands-on testing and iterative improvements.
-

EDUCATION

B.E. Computer Engineering

Shree Swaminarayan Institute of Technology, Gandhinagar

2021 – 2025 | CGPA: 7.43
